PROFESSIONAL SUMMARY

Software Engineer with 5+ years of experience in mobile development and digital products, with strong expertise in native iOS (Swift, SwiftUI, and UIKit) and complementary experience with Flutter/Dart, React/TypeScript, Node.js, and AWS. Experienced across the full software lifecycle - architecture, APIs, authentication, geolocation, testing, CI/CD, and production releases - in mobility, healthcare, and B2B platforms. Hands-on experience with MVVM-C/Clean Architecture, REST/WebSockets, relational databases, and AWS infrastructure, as well as technical leadership and close collaboration with Product, UX/UI, and business teams.

TECHNICAL SKILLS

Mobile / iOS & Cross-platform: Swift, SwiftUI, UIKit, Objective-C, Flutter, Dart, MapKit, CoreLocation, Core Data, Keychain, Combine, RxSwift, URLSession, Alamofire, Apple HIG, Accessibility

Architecture & Quality: MVVM, MVVM-C, Clean Architecture, SOLID, Dependency Injection, Coordinators, VIPER, XCTest, XCUITest, Snapshot Testing, TDD, SwiftLint, Crashlytics, code review

Web / Backend & Data: React, Next.js, TypeScript, JavaScript, Vite, Tailwind CSS, Node.js, Prisma ORM, RESTful APIs, WebSockets, MySQL, Amazon RDS, Firebase, Firestore

Cloud / CI/CD & Releases: AWS Cognito, CloudFormation, AWS CLI, S3, CloudFront, GitHub Actions, Fastlane, Xcode Cloud, TestFlight, App Store Connect, feature flags, canary releases, rollback

Product & Tools: discovery, UX/UI, technical documentation, Git/GitHub, Figma, Jira, Notion, Trello, Scrum, Kanban, Agile

Additional Knowledge: Linux, Bash, PowerShell, Python, Django, SEO, Google Analytics, marketing automation, CRM, chatbots, and WhatsApp Business API

PROFESSIONAL EXPERIENCE

Software Engineer (Contractor) | SelectApp Mobility / AutoPop

Jun 2025 - Present | Remote

- End-to-end development across a mobility and assistance ecosystem, working with iOS (Swift/SwiftUI/UIKit), Flutter/Dart, React/TypeScript/Vite, and a Node.js/MySQL/AWS backend.
- Implemented and maintained critical authentication, mapping, and geolocation flows, including MapKit/CoreLocation, location permissions, address search, suggestions, and responsive behavior across web and mobile.
- Integrated REST APIs and WebSockets, maintained client-server contracts, handled errors, and supported schema migrations and data reconciliation with MySQL/Amazon RDS.
- Contributed to the evolution of a context-oriented architecture using feature flags, behavior/data isolation, and compatibility strategies during version transitions.
- Managed staging/production releases on AWS with preflight checks, readiness validation, smoke tests, canary rollouts, rollback procedures, and root-cause analysis of cross-stack failures; deployed frontend applications through S3/CloudFront.

Manager & Full-Stack Developer | ThiFi Agency

Jan 2025 - Present | Remote

- Technical leadership and full-stack development across digital products, coordinating architecture, frontend, backend, cloud, integrations, documentation, and collaboration among engineering, design, and product.
- On IMOB, evolved and stabilized frontend/backend systems with authentication and user management through Amazon Cognito, infrastructure as code with CloudFormation, and operational diagnostics through AWS CLI.
- Performed type checks, builds, automated tests, and smoke tests; investigated backend failures, applied patches, and validated runtime behavior before releases.
- On OneMedia, developed features with Next.js, React, Tailwind CSS, and Firebase, including integrations with Google Maps, Instagram, WhatsApp Business, and payment gateways.

iOS Developer (Contractor) | Hapvida Saúde

Jun 2022 - Jun 2023 | Remote

- Developed and enhanced iOS features for a healthcare product in close collaboration with innovation, product, and design teams.
- Implemented and maintained the digital prescription module, REST API integrations, state management, and error handling across critical application flows.
- Applied Apple Human Interface Guidelines, accessibility standards, and reliability best practices to patient and healthcare professional journeys.

iOS Developer - Apple Developer Academy | Catholic University of Brasília (UCB)

Mar 2021 - Dec 2022 | Brasília-DF, Brazil

- Completed an immersive Apple-platform development program, building iOS and watchOS applications from discovery, research, and prototyping through development, testing, and delivery.
- Used Swift, SwiftUI, UIKit, HealthKit, Core Data, MapKit, GameKit, Xcode Cloud, and DocC documentation in collaborative projects.
- Applied Challenge Based Learning (CBL), code review, and product demonstrations in Portuguese and English; developed a project for the 2022 Swift Student Challenge using Xcode Playgrounds.

SELECTED PROJECTS

Genika: iOS/watchOS application built with SwiftUI, HealthKit, Core Data, and CloudKit to visualize habits and routine indicators.

Dizcarta: cooperative card game built with SwiftUI/Core Data, Xcode Cloud, and DocC documentation, developed from research with subject-matter specialists.

Swift Student Challenge 2022: interactive experience built with Xcode Playgrounds, focused on learning through chapter-based challenges and user interaction.

White-label platform for salons and barbershops: web platform built with Next.js and Firebase, featuring scheduling, service catalog, e-commerce, an admin dashboard, and payment/communication integrations.

FalaUBS: Django web application featuring vaccine search, filters, geolocation of nearby healthcare units, and online appointment scheduling.

EDUCATION

Bachelor of Science in Computer Science - Catholic University of Brasília (UCB) | Feb 2019 - Jun 2025

Postgraduate Certificate in Innovation and Digital Transformation - Gran Centro Universitário | Sep 2023 - Aug 2025

Apple Developer Academy / UCB - Specialization in Apple Platform Development | Mar 2021 - Dec 2022

LANGUAGES

Portuguese: Native | English: Advanced reading and writing; intermediate speaking
